

Social Audit: Concept and Application

Dr. C.Dheeraja

Pro-poor Development

- Four essential components necessary for pro-poor development
 - Participation – people need to be involved in schemes which aim to address the difficult situations they are in
 - Inclusion – Many schemes meant for the poor exclude the poor, women, disadvantaged communities
 - Accountability – have to explain why certain decisions were taken / not taken and then have to face the consequences for that
 - Transparency – Transparency is necessary to enforce accountability and also help with participation
- Social Audit is one of the social accountability tools that promote all of the above

What is social audit

- Can be interpreted in many ways
- Assessment of how well a company has discharged its social obligations
- In development programmes, social audit is a process by which the people, the final beneficiaries of any scheme, programme, policy or law, are empowered to audit such schemes, programmes, policies and laws.
- A social audit is an ongoing process by which the potential beneficiaries and other stakeholders of an activity or project are involved from the planning to the monitoring and evaluation of that activity or project.
- However, 'social audit' can also be understood in a broader sense, as a continuous process of public vigilance.

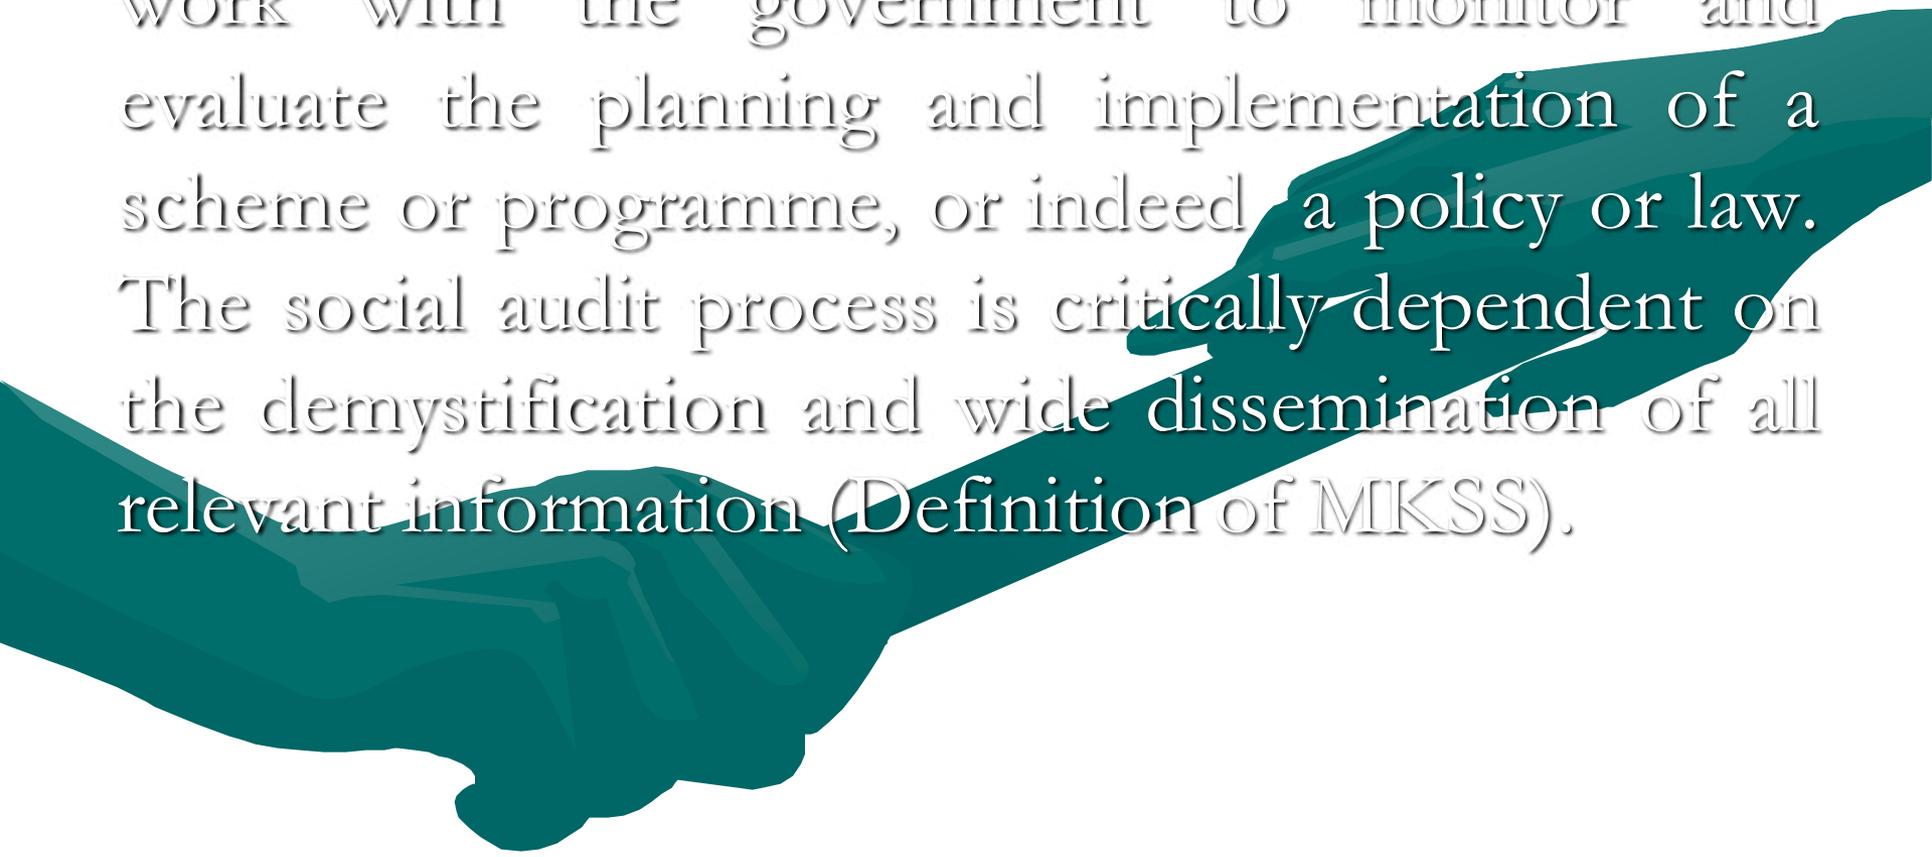

Meaning of Social Audit

Social Audit is the process in which, details of the resource, both financial and non-financial, used by public agencies for development initiatives are shared with the people, often through a public platform. Social Audits allow people to enforce accountability and transparency, providing the ultimate users an opportunity to scrutinize development initiatives.

Meaning of Social Audit

A social audit is a process in which the people work with the government to monitor and evaluate the planning and implementation of a scheme or programme, or indeed a policy or law. The social audit process is critically dependent on the demystification and wide dissemination of all relevant information (Definition of MKSS).
